

Confidential Information Memorandum

Target: NovaGrid Technologies Pvt. Ltd.
Fictional document created for AI workflow testing.

1. Executive Summary

NovaGrid Technologies provides industrial IoT and AI software for renewable energy operators across India and Southeast Asia. The company serves utility-scale solar and wind operators with predictive maintenance, energy analytics, and asset monitoring.

2. Company Overview

Founded in 2016, NovaGrid has expanded to over 220 enterprise customers. Revenue has grown through recurring SaaS subscriptions and implementation services.

Metric	FY2023	FY2024	FY2025
Revenue (\$M)	18.4	25.7	34.6
EBITDA (\$M)	4.2	6.5	9.8
EBITDA Margin	22.8%	25.3%	28.3%
ARR (\$M)	11.5	16.8	23.1

3. Market Opportunity

The addressable market includes utility operators, EPC contractors, and independent power producers. Digitalization and predictive maintenance adoption are expected to accelerate.

4. Customers & Risks

Top customers account for 31% of revenue. Churn remains below 3%. Key risks include long enterprise sales cycles, dependence on infrastructure spending, and competition from global industrial software vendors.

5. Growth Strategy

Expansion into the Middle East, AI-based asset optimization, and acquisitions of niche analytics providers are expected to drive future growth.
